

Project Showcase

About Us

M/s. **Team Design** was established in the year 1999 with a small office of 600sqft in Lower Parel, Mumbai.

It is over 2 decades that it has grown both in the range and scale of projects it is involved in.
We now have our own office building of 10000sqft in Navi Mumbai along with office extensions in Pune.

The company has accumulated extensive experience in planning, designing and executing large architectural and interior projects.

Architectural projects include office buildings, institutional campuses, hostel facilities, commercial buildings, bungalows etc., while interior projects include commercial, residential and retail developments.

What We Do

Architectural Design

We have the ability to shape space and light with great contextual sensitivity and to utilize the unique qualities of each project to create a concept-driven design

Interior Design

The interior design team has significant expertise in a wide range of project types, from single-family homes, high budgeted residential interiors, bungalows, religious spaces, tailor made offices, retail spaces to and large scale commercial interiors.

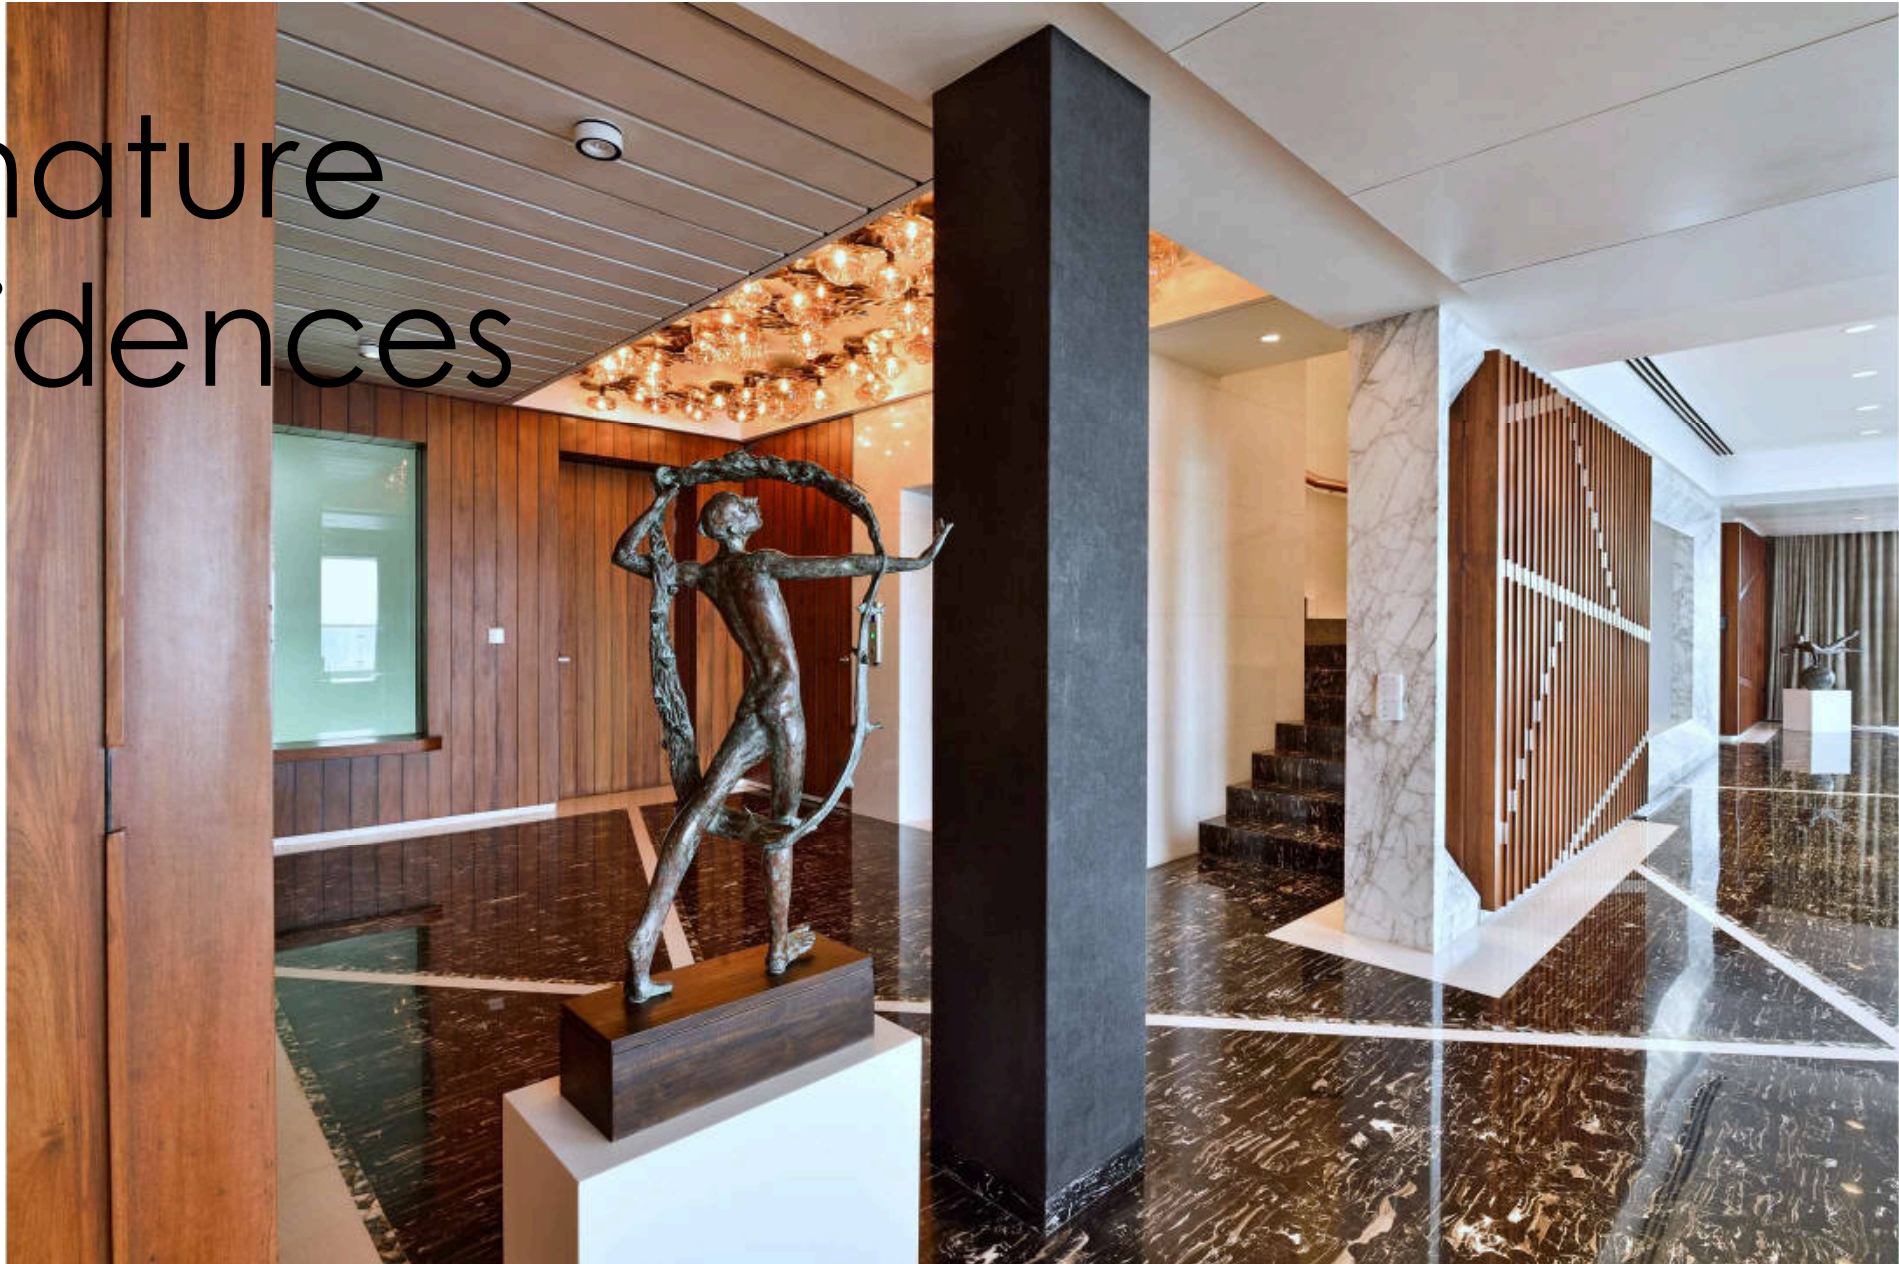

Sustainable Design

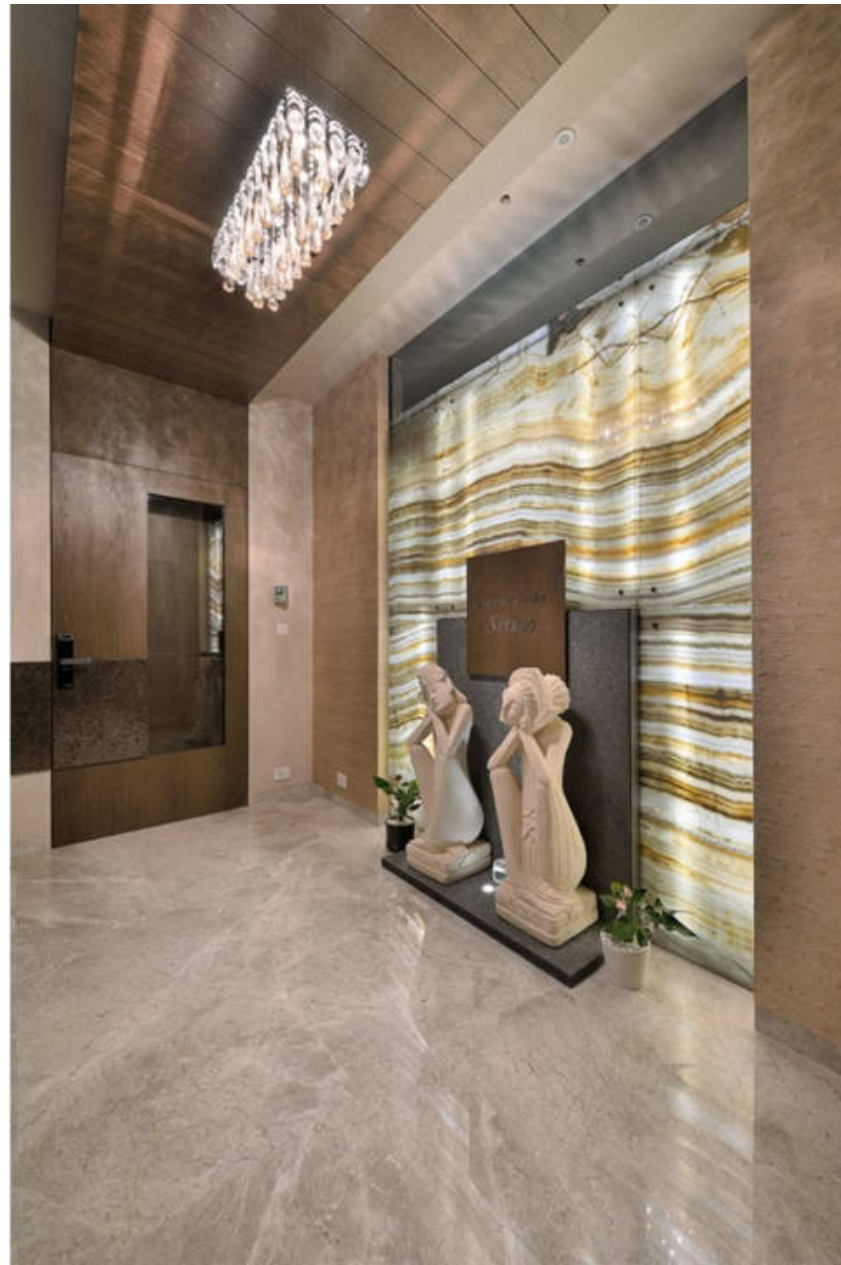

We follow the simple principles of sustainability like solar power, rain water harvesting, using ecofriendly materials etc. and bring it to logical conclusion with every project. That inevitably changes everything about architecture, including its purpose, process, and products. We believe that 'design isn't separate from sustainability—it's the key to it.'

Bespoke Furniture Design

We have a passion and an innate sense of proportion for designing furniture. Our designs showcase functionality, practicality in tandem with the design intent of every project.

Signature Residences

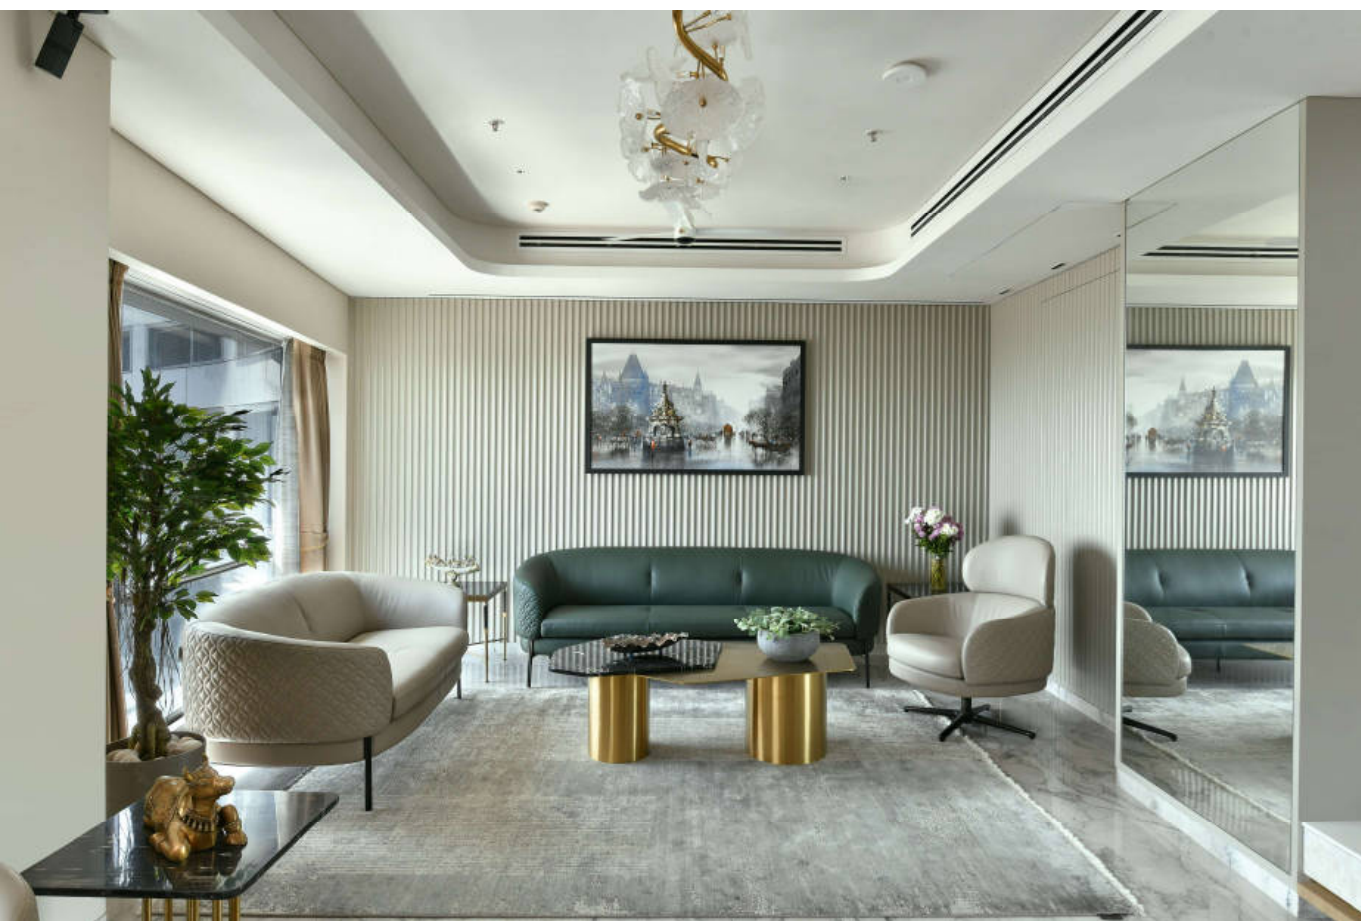

Creating interiors that reflect the people who inhabit them. Our approach to interior design combines thoughtful planning, refined material palettes, bespoke detailing and a strong understanding of proportion, light and functionality. Every space is carefully crafted to balance aesthetics with comfort, creating interiors that are distinctive, timeless and deeply personal.

Contemporary Bungalows

Corporate & Banking Projects

A photograph of a modern office interior. The space features a central corridor with a light-colored tiled floor and recessed ceiling lights. On either side of the corridor are glass-walled cubicles or offices. The cubicles have white lower panels and glass upper sections. Some cubicles contain desks and office chairs. The walls are a neutral tone, and the overall atmosphere is clean and professional.
